

# Bus on Shoulder Feasibility Study: Update

- ◆ Study purpose is to examine the technical, operational, geometric, and policy options regarding part-time shoulder running for transit bus operations along I-205 and SR-14
- ◆ Result in findings and recommendations on its viability and, if warranted, a recommended BOS concept within the bi-state region

# Study Area

- ◆ SR-14 from 164<sup>th</sup> to I-205
- ◆ I-205 from 18<sup>th</sup> Street to I-84

# Work to Date

- ◆ Two TAC meetings
- ◆ Reviewed study purpose, goals, and data collection needs
- ◆ Inventoried and collected data and roadway geometrics
- ◆ Data includes mapping of roadway geometry, traffic volumes and speeds, detailed bus speeds, and crash data
- ◆ Currently planning Bus on Shoulder Workshop

# Bus on Shoulder Workshop

- ◆ December 5 and 6 at the Rose Besserman Room at Fisher's Landing Park and Ride
- ◆ December 5, Afternoon Session One: High-level focus with policy, management, and technical staff
- ◆ December 6, Morning Session Two: Technical focus with technical and operations staff and other stakeholders potentially affected by any proposed system

# Workshop Activities

# Next Steps

- ◆ Save the Date” invitations this week
