

Appendix N: Plans, Studies, and Projects

The RTP is a living document and will continue to evolve and be updated on a regular basis to address a number of long-term regional transportation projects, programs, plans, and studies that require further monitoring, evaluation, and policy decisions prior to inclusion in the RTP. The 20-Year RTP Projects included in this appendix are composed of regional and local planned projects. This appendix summarizes the range of transportation studies, plans, programs, and projects that, combined, achieve the RTP's vision and that are also identified to help get closer to implementing the RTP's transportation goals: Economic Vitality and Quality of Life, Safety and Security, Accessibility and Mobility, and Sustainability and Resiliency (refer to Chapter 3). RTC will continue to engage and collaborate with regional partners and stakeholders to ensure the successful implementation of this plan as we collaborate with our planning partners in the development of studies, plans, and programs and implement projects in the RTP lists and action strategies proposed in this plan.

Projects, Programs, Plans, and Studies

Interstate Bridge Replacement Program (IBR)

The Interstate Bridge is a critical connection between Oregon and Washington, located on Interstate 5 where it crosses the Columbia River. Replacing the aging Interstate Bridge across the Columbia River with a modern, earthquake resilient, multimodal structure that provides improved mobility for people, goods, and services is a high priority for Oregon and Washington. The IBR program is a renewed effort jointly led by the Oregon Department of Transportation and the Washington State Department of Transportation, in collaboration with eight regional partner agencies: Oregon Metro, Southwest Washington Regional Transportation Council, TriMet, C-TRAN, City of Portland, City of Vancouver, Port of Portland, and Port of Vancouver. These partners serve on an Executive Steering Group that provides regional leadership recommendations to the program. The [IBR](#) program continues to work with the program partner agencies, stakeholders, and public to identify the best possible multimodal solution.

I-5 and I-205 Regional Mobility Pricing Project (RMPP)

The Regional Mobility Pricing Project ([RMPP](#)) will apply congestion pricing on all lanes of Interstate-5 and Interstate-205 to manage travel demand and traffic congestion on these facilities in the Portland, Oregon metropolitan area in a manner that will generate revenue for transportation system investments. The pricing varies by time of day according to a set schedule, which can be updated

periodically by the Oregon Transportation Commission. Higher fees will be charged during peak travel periods (such as morning and evening peak hours) and lower fees during off-peak hours. Congestion pricing is intended to encourage motorists to plan travel in advance and allows traffic to flow more freely during peak times.

The process to implement a toll program requires substantial analysis, public input, construction, testing, and education before the system can be operational. The earliest tolling could begin under the Regional Mobility Pricing Project is 2026.

Cascadia High-Speed Rail Study

The [Cascadia High-Speed Rail Study](#) proposes to connect people and communities, increase economic competitiveness, and improve quality of life across the Cascadia megaregion. This fast, safe, predictable way to travel would connect the metro areas of Vancouver, B.C.; Seattle, WA; Portland, OR, and points between and beyond. With equity as a guiding principle, the high-speed rail project could help connect local workers to family-wage jobs, increase access to affordable housing choices, and offer greater mobility for almost 9 million people. This project is also part of a growing movement to mitigate the impacts of climate change by using clean energy. Rather than relying on congested highways or increasing air traffic, the high-speed rail project offers a sustainable alternative to traveling greater distances quickly and reliably. Study recommendations will be evaluated as appropriate for inclusion into the Regional Transportation Plan.

In fall 2021 the states of Washington and Oregon and the province of British Columbia signed a Memorandum of Understanding to continue to advance this work. In December 2023 Cascadia High-Speed Rail and Amtrak Cascades were accepted into USDOT's Corridor Identification and Development Program, bringing formal federal funding and participation. WSDOT, ODOT, and the B.C. Ministry of Transportation and Infrastructure continue to collaborate with partners along the corridor to shape future planning and development activities.

Columbia Connects

[Columbia Connects](#) is a regional project intended to strengthen the bistate partnership between Oregon and Washington. Centered around the ecosystem of industries and work sheds that are interconnected by the Columbia River, the project seeks to develop a clear understanding of the conditions within this subdistrict; the shared economic and community values of the region; and the strategies, projects, and programs needed to achieve desired outcomes. Columbia Connects provides a shared investment strategy that outlines specific opportunities for investment based on feasibility, effectiveness, equity, and input from project champions. Convened by Metro and RTC, the partners will finalize and carry out actions included in a shared investment strategy, continuing to partner across state boundaries to establish agreements and commitments for implementation and ongoing coordination on resource acquisition.

Clark County Freight Mobility Study

The 2009 [Clark County Freight Mobility Study](#) was developed to provide an understanding of the key elements of freight movement and to explain why freight and goods movement is important to Clark County's economy and employment. The study inventoried existing freight and goods movement and identified current deficiencies and future action items to be addressed as part of ongoing regional and local planning processes. In addition, the study began to identify corridor investment needs to sustain jobs and economic development for existing and future industrial and employment centers. The Clark County Freight Mobility Study will be updated in 2024.

Washington State Freight Plan

As the secondmost trade-dependent state per capita in the USA, Washington relies heavily on an efficient freight transportation network. The freight system supports 1.41 million jobs in freight-dependent industries in Washington, with a gross business income of \$550.5 billion. Freight and goods are shipped into, out of, and around Washington by truck, rail, air, pipeline, and water.

The [Washington State Freight System Plan](#) was completed and certified by the Federal Highway Administration on December 1, 2017. The freight plan addresses multimodal freight transportation and speaks of three components of the freight transportation system:

- Global Gateways, which provides freight access to international markets;
- Made in Washington, providing transportation for freight that is manufactured or produced in Washington; and
- Delivering Goods to You, representing local freight delivery for businesses and residents.

Washington State Rail Plan

In Washington State, freight rail needs are addressed in Washington State Department of Transportation's (WSDOT's) [2019 Washington State Rail Plan](#). The plan serves as a blueprint for public investment in the state's rail transportation system.

Truck Parking Action Plan

[The Truck Parking Action Plan](#) recommends various options and strategies to address the shortage of truck parking in Washington State and provides a summary of truck parking issues and potential solutions to identify the gap in need vs. availability of truck parking in Washington State, as well as possible options to address the issue. In addition, it includes an action plan for Washington State, with specific next steps for the highest priority actions. The solutions identified will address immediate needs and set the State up for long-term success in addressing the issue.

METRO's Regional Freight Strategy Study

This [study](#) seeks to identify and produce increases in rail capacity, safety, land use compatibility, and operational efficiencies to support freight and goods movement in the region, which is important to our

long-term economic and environmental sustainability and will help to maintain the region's competitive advantage in a global marketplace. This strategy will provide a coordinated vision and approach for enhancing freight and goods movement and prioritizing freight investments based on clear priorities.

Washington Transportation Plan

The Washington Transportation Plan (WTP) is the state's long-range transportation plan, based on the Legislature's six policy goals: economic vitality, preservation, safety, mobility, environmental & health, and stewardship. This 20-year vision for improving the state's transportation network is completed in two parts: policy and implementation. The policy plan, [2040 & Beyond](#), provides statewide policy recommendations to the Legislature. The implementation plan, [Washington Transportation Plan, Phase 2 - Implementation 2017-2040](#), applies key policy recommendations for the WTP to further develop the state's complex transportation system through four focus areas: maintain and preserve assets; manage growth and traffic congestion; enhance multimodal connections and choices; and align the funding structure with the multimodal vision. The Washington Transportation Plan is being updated. It is anticipated that the plan update will be completed by the end of 2025.

Clark County Comprehensive Economic Development Plan

The Columbia River Economic Development Council (CREDC) adopted its [Clark County Comprehensive Economic Development Plan](#) in August 2017. The plan includes goals to expand the existing base industry clusters in the region, including computer and electronic, clean tech, software, metals and machinery, and life sciences. Goal 2 includes support for the region's people by developing a resilient economy. Goal 3 relates to creating places, including making employment areas shovel ready and determining regional transportation needs to support economic development.

Clark County Employment Land Study

In 2016 CREDC adopted the [Clark County Employment Land Study](#). This study is an economic development and policy tool for civic leaders and policymakers. The study identified 56 employment sites that are 20 acres and larger throughout Clark County. The study considers the market, land use, and physical characteristics to assess site readiness. The RTP includes projects that will support economic development and access to employment lands.

Clark County's Comprehensive Growth Management Plan

Clark County's Comprehensive Growth Management Plan (Plan) is a long-range policy guide for how the County plans to manage growth and development over a 20-year period. The Plan is required by the [Growth Management Act](#). The plan contains elements comprised of existing conditions, goals, policies, and strategies to accomplish the Plan's goals. Consideration of transportation system improvements responsive to the growth management plans will be a priority to optimize public and private investments in regional and local transportation infrastructure.

Transportation Corridor Visioning Study

The RTC Board endorsed the [Transportation Corridor Visioning Study](#) in April 2008. The Visioning Study recommendations presented broad concepts for new regional corridors, corridors connecting places, and current and potential future nodes of growth in Clark County. Corridors on the eastside (north-south) connections between east Vancouver/Camas/Washougal and Battle Ground, east-to-west connections between Battle Ground and the Discovery Corridor, and westside connections were all considered. The Visioning Study recommendations concluded that further regional land use planning review and analysis is needed prior to further review of potential new corridors in order to gauge whether future growth forecasts warrant such a project discussion. The study also recommended that future study should include review of the impacts of these candidate corridors on future land use patterns within Clark County. That analysis should occur during a future countywide Growth Management Planning comprehensive plan process.

Human Services Transportation Plan (HSTP)

RTC's [Human Services Transportation Plan](#) addresses the transportation needs of those with mobility challenges and special transportation needs, including people with disabilities, the elderly, the young, low-income populations, and rural residents unable to provide their own transportation. The first HSTP for this region—which includes Clark, Skamania, and Klickitat counties—was adopted in 2007. Plan updates followed in 2011, 2014, 2018, and 2022. A plan update is required at least every four years. The intent of the Human Services Transportation Plan is to identify transportation needs and solutions and thereby improve transportation services for people with disabilities; seniors; and, in general, those unable to drive themselves. Development of a Human Service Transportation Plan ensures that communities coordinate transportation resources provided through multiple federal programs. A coordinated plan can help to enhance transportation access, minimize duplication of services, and encourage the most cost-effective transportation possible.

Washington Statewide Human Services Transportation Plan

The [Statewide Human Services Transportation Plan](#) serves as a strategic framework for addressing the state's existing and future human services transportation needs. The plan was developed through collaboration with affected stakeholders and with public input. The Statewide HSTP provides a set of goals and strategies to facilitate coordination and maximize resources to meet the transportation needs of the most vulnerable people in our state.

C-TRAN Transit Development Plan

C-TRAN's [Transit Development Plan](#) is a long-range, comprehensive strategy for enhancing public transportation for Clark County residents over the next 20 years. C-TRAN's plan is designed to respond to growing transportation needs and the need to provide expanded, reliable, and safe service. Maintaining and expanding transit service is vital for ensuring the economic vitality and quality of life of the region.

Clark County High Capacity Transit (HCT) Study

The [Clark County High Capacity Transit System Study](#) was adopted in December 2008 following a two-year planning process. The HCT plan provided a blueprint for C-TRAN and the Clark County region to move high capacity transit improvements forward in identified HCT corridors. The HCT System Study assumes that traffic volumes will increase over time as planned growth and economic development continue in the Clark County region. The constrained ability to expand highway capacity in several key regional transportation corridors is expected to worsen traffic, increasing the need to develop a transportation alternative.

Projects and strategies resulting from these studies will be addressed further as part of the Comprehensive Growth Management planning process and future RTP updates. If projects are identified and considered feasible, further detailed analysis and financial modeling may be warranted prior to inclusion into the fiscally constrained RTP.

Washington State Active Transportation Plan

The [Active Transportation Plan - 2020 and Beyond](#) is a compass for creating the future of walking, biking, and rolling on or across state highways in Washington. It is used in decisions to help connect people to where they want to go, whether they use active transportation for the whole trip or just a part of it, such as walking to a bus stop, riding a bike to work, or rolling home from a ferry terminal.

Regional Active Transportation Plan for Clark County

The [Active Transportation Plan](#) addresses objectives, policies, goals, the regional active transportation system network, programs, and projects. It describes the status of walking, bicycling, and rolling and access to transit in the Clark County region. The plan provides a needs assessment that considers user demand for active transportation, equity, and safety considerations. These analyses can help decision-makers understand where to target resources to have the greatest impact on improving active transportation in Clark County. This plan can be found on Appendix F.

Clark County Bicycle and Pedestrian Master Plan

In November 2010 the Board of Clark County Commissioners approved the [Clark County Bicycle and Pedestrian Master Plan](#) to make it safer and more convenient for people to get to major destinations in our region on foot or by bicycle. The plan identifies ways to improve the transportation network by integrating existing sidewalks, bike lanes, and trails. The plan points out that this will require design standards that work well with Clark County's transportation network for motor vehicles.

Clark County Parks and Open Space Plan

The Parks, Recreation, and Open Space ([PROS](#)) Plan is a six-year plan that anticipates the programming and capital projects necessary to meet the community's needs for parks, recreation, and open space, as well as trails. This plan identifies local, regional, and national growth trends in recreational activities such as walking, cycling, team sports, and picnicking. The PROS Plan for Clark County is a functional part of the County's Comprehensive Plan. It provides a six-year strategic plan and policy framework to meet the county's park and recreational needs. The purpose of the plan is twofold: to meet Growth Management Act (GMA) requirements and to set forth a six-year capital facilities program for park development and acquisitions focused on gaps in levels of service; asset diversity; and diversity, equity and inclusion.

Regional Emergency Transportation Route Update

The designated [Regional Emergency Transportation Routes](#) (RETR) for the five-county Portland-Vancouver metropolitan region—which includes Clackamas, Columbia, Multnomah, and Washington counties in Oregon and Clark County in Washington—was updated in 2021. Although this effort is primarily focused on updating the RETR for emergency response immediately following a large seismic event, considerations for other natural hazards—such as flooding, wildfire, and severe weather—will be incorporated into the data set and project recommendations for future consideration, including work to support transportation recovery planning. A second phase of follow-up work will be proposed to prioritize/tier the updated routes and develop operational guidance for route owners/operators.

20-Year RTP Projects

The 20-Year RTP project list includes planned projects that are on the regional transportation system, as well as local arterial projects that are not on the designated system. The majority of these projects do not have an identified funding source but are still community priorities for implementation during the RTP's 2045 planning horizon.

2024 Regional Transportation Plan 20 Year List of Projects

Facility	Cross Streets	Project Description	Estimated Completion Year	Jurisdiction /Agency	Project Cost Estimate	Regional (R) Local (L)	Performance Measures	RTP Goals
NE 1st St	N Parkway Ave to NE Grace Ave	Reconstruct roadway to Major Collector standard: 3 lanes; 1 in each direction and a center turn lane or median along with bike lanes and sidewalk	2036 - 2045	Battle Ground	\$3,100,000	L	Safety, Pavement, Non-SOV	Accessibility & Mobility
SE 1st St	S Parkway Ave to SE Grace Ave	Reconstruct roadway to Major Collector standard: 3 lanes; 1 in each direction and a center turn lane or median along with bike lanes and sidewalk	2036 - 2045	Battle Ground	\$3,400,000	L	Safety, Pavement, Non-SOV	Accessibility & Mobility
SW 6th Ave	SW Scotton Way to SW Eaton Blvd	Construct new road to Neighborhood Collector Standard: 2 lanes; 1 in each direction with a center median, bike lanes and sidewalk	2028 - 2035	Battle Ground	\$1,500,000	L	Safety, Pavement, Non-SOV	Accessibility & Mobility
SW 6th/ 7th Ave	SW Rasmussen Blvd to SW Scotton Way	Construct new road to Neighborhood Collector Standard: 2 lanes; 1 in each direction with a center median, bike lanes and sidewalk	2036 - 2045	Battle Ground	\$2,100,000	L	Safety, Pavement, Non-SOV	Accessibility & Mobility
NE 10th St	NE Grace Ave to East City Limits	Reconstruct roadway to Minor Arterial standard: 3 lanes; 1 in each direction and a center turn lane or median, bike lanes and sidewalk	2036 - 2045	Battle Ground	\$6,200,000	L	Safety, Pavement, Non-SOV	Accessibility & Mobility
SW 11th Ave	SW 25th St to SW 30th St	Construct the missing segments to Neighborhood Collector Standard: 2 lanes; 1 in each direction with a center median, bike lanes and sidewalk	2036 - 2045	Battle Ground	\$1,500,000	L	Safety, Pavement, Non-SOV	Accessibility & Mobility

Facility	Cross Streets	Project Description	Estimated Completion Year	Jurisdiction /Agency	Project Cost Estimate	Regional (R) Local (L)	Performance Measures	RTP Goals
SW 15th/ 13th Ave	SW 6th St to SW Eaton Blvd	Complete roadway & construct missing segments to Neighborhood Collector Standard: 2 lanes; 1 in each direction with a center median, bike lanes and sidewalk	2036 - 2045	Battle Ground	\$2,400,000	L	Safety, Pavement, Non-SOV	Accessibility & Mobility
NW 15th Ave	NE 239th St to NW 18th St	Complete roadway & construct missing segments to Neighborhood Collector Standard: 2 lanes; 1 in each direction with bike lanes and sidewalk	2036 - 2045	Battle Ground	\$800,000	L	Safety, Pavement, Non-SOV	Accessibility & Mobility
NW 15th Ave	NW 9th St to NW 4th St	Construct missing segment to Neighborhood Collector Standard: 2 lanes; 1 in each direction with a center median, bike lanes and sidewalk	2036 - 2045	Battle Ground	\$800,000	L	Safety, Pavement, Non-SOV	Accessibility & Mobility
NW 20th Ave	NW Orndorff Blvd to SR 502	Complete roadway and construct missing segments to Major Collector standard: 3 lanes; 1 in each direction and a center turn lane or median along with bike lanes and sidewalk	2036 - 2045	Battle Ground	\$1,200,000	L	Safety, Pavement, Non-SOV	Accessibility & Mobility
NW 20th Ave	NE 239th St to NE 244th St	Reconstruct roadway to Major Collector standard: 3 lanes; 1 in each direction and a center turn lane or median along with bike lanes and sidewalk	2028 - 2035	Battle Ground	\$1,150,000	L	Safety, Pavement, Non-SOV	Accessibility & Mobility
SW 20th Ave	SW Rasmussen Blvd to SW Eaton Blvd	Reconstruct roadway to Minor Arterial standard: 3 lanes; 1 in each direction and a center turn lane or median, bike lanes and sidewalk	2036 - 2045	Battle Ground	\$5,600,000	L	Safety, Pavement, Non-SOV	Accessibility & Mobility

Facility	Cross Streets	Project Description	Estimated Completion Year	Jurisdiction /Agency	Project Cost Estimate	Regional (R) Local (L)	Performance Measures	RTP Goals
SW 25th St	SW 11th Ave to SR 503	Construct missing segments to Neighborhood Collector Standard: 2 lanes; 1 in each direction with a center median, bike lanes and sidewalk.	2036 - 2045	Battle Ground	\$400,000	L	Safety, Pavement, Non-SOV	Accessibility & Mobility
NE 25th St	SR 503 to N Parkway Ave	Construct new road to Major Collector standard: 3 lanes; 1 in each direction and a center turn lane or median along with bike lanes and sidewalk	2028 - 2035	Battle Ground	\$1,632,599	L	Safety, Pavement, Non-SOV	Accessibility & Mobility
NE 25th St	NE 5th St to NE Grace Ave	Construct roadway to Major Collector standard: 3 lanes; 1 in each direction and a center turn lane or median along with bike lanes and sidewalk	2036 - 2045	Battle Ground	\$2,000,000	L	Safety, Pavement, Non-SOV	Accessibility & Mobility
SW 30th St	SW 20th Ave to SR 503	Reconstruct roadway to Minor Arterial standard: 3 lanes; 1 in each direction and a center turn lane or median, bike lanes and sidewalk	2036 - 2045	Battle Ground	\$4,400,000	L	Safety, Pavement, Non-SOV	Accessibility & Mobility
NE 72nd Ave	NE 229th St to Southern UGB	Reconstruct roadway to Minor Arterial standard: 3 lanes; 1 in each direction and a center turn lane or median, bike lanes and sidewalk	2036 - 2045	Battle Ground	\$6,100,000	L	Safety, Pavement, Non-SOV	Accessibility & Mobility
NE 92nd Ave	SR 502 to SW 11th St	Construct new road to Major Collector standard: 3 lanes; 1 in each direction and a center turn lane or median along with bike lanes and sidewalk	2036 - 2045	Battle Ground	\$4,000,000	L	Safety, Pavement, Non-SOV	Accessibility & Mobility
NE 152nd Ave	NE 181st St to South City Limits	Reconstruct roadway to Major Collector standard: 3 lanes; 1 in each direction and a center turn lane or median along with bike lanes and sidewalk	2036 - 2045	Battle Ground	\$2,700,000	L	Safety, Pavement, Non-SOV	Accessibility & Mobility

Facility	Cross Streets	Project Description	Estimated Completion Year	Jurisdiction /Agency	Project Cost Estimate	Regional (R) Local (L)	Performance Measures	RTP Goals
NE 183rd St	Eastern Terminus to NE 167th Ave	Construct new road to Neighborhood Collector Standard: 2 lanes; 1 in each direction with a center median, bike lanes and sidewalk	2036 - 2045	Battle Ground	\$1,400,000	L	Safety, Pavement, Non-SOV	Accessibility & Mobility
NE 239th St	NE 92nd Ave to NW 30th Ave	Reconstruct roadway to Major Collector standard: 3 lanes; 1 in each direction and a center turn lane or median along with bike lanes and sidewalk	2036 - 2045	Battle Ground	\$4,000,000	L	Safety, Pavement, Non-SOV	Accessibility & Mobility
NE 239th St	NW 30th Ave to NW 20th Ave	Reconstruct roadway to Neighborhood Collector Standard: 2 lanes; 1 in each direction with a center median, bike lanes and sidewalk	2036 - 2045	Battle Ground	\$2,900,000	L	Safety, Pavement, Non-SOV	Accessibility & Mobility
NE 249th St	N Parkway Ave to NE Grace Ave	Complete roadway & construct missing segments to Neighborhood Collector Standard: 2 lanes; 1 in each direction with a center median, bike lanes and sidewalk	2036 - 2045	Battle Ground	\$1,500,000	L	Safety, Pavement, Non-SOV	Accessibility & Mobility
Chelatchie Prairie Rail Trail	Northeastern UGB to South UGB Limits	Construct new multimodal path	2028 - 2035	Battle Ground	\$866,744	L	Safety, Non-SOV	Accessibility & Mobility
Chelatchie Prairie Rail Trail	E Main St to SE Rasmussen Blvd	Construct new multimodal path	2028 - 2035	Battle Ground	\$1,562,639	L	Safety, Non-SOV	Accessibility & Mobility

Facility	Cross Streets	Project Description	Estimated Completion Year	Jurisdiction /Agency	Project Cost Estimate	Regional (R) Local (L)	Performance Measures	RTP Goals

Facility	Cross Streets	Project Description	Estimated Completion Year	Jurisdiction /Agency	Project Cost Estimate	Regional (R) Local (L)	Performance Measures	RTP Goals
ATM Spot Treatments	Systemwide	Install ATM/queue warning at spot locations	2036 - 2045	WSDOT	\$11,400,000	R	Safety, Pavement, Congestion, Bridge, Non-SOV	Accessibility & Mobility
I-5	I-5/Victory Blvd. to SR 500	Replace I-5/Columbia River bridges, add auxiliary lanes & improve interchanges on I-5, extend light rail transit from Expo Center to Vancouver, WA., add protected/buffered bikeways, cycle tracks & a new trail/multiuse path or extension and implement variable rate tolling	2028 - 2035	WSDOT	\$6,000,900,000	R	Safety, Pavement, Congestion, Bridge, Non-SOV	Economic Vitality & Quality of Life
I-5	I-5/Interstate Bridge	Upgrade electrical control system	2028 - 2035	WSDOT	\$515,447	R	Safety, Air Quality, Congestion	Sustainability & Resiliency
I-5	At Mill Plain	Construct interchange improvements. Add turn lanes, realign ramp curves to allow oversize loads, add metered lanes to on-ramps for storage.	2028 - 2035	WSDOT	\$117,726,836	R	Safety, Air Quality, Congestion	Sustainability & Resiliency
I-5	179th St Interchange Improvements	Interchange improvements	2028 - 2035	WSDOT	\$88,265,455	R	Safety, Air Quality, Congestion	Economic Vitality & Quality of Life
I-5		Install ramp meters on SB on-ramps from SR 501 to NE 99 th St.	2036 - 2045	WSDOT	\$2,700,000	R	Safety, Air Quality, Congestion	Accessibility & Mobility
I-5	E Fork Lewis River Bridge NB	Northbound bridge replacement	2028 - 2035	WSDOT	\$118,476,981	R	Bridge	Sustainability & Resiliency
I-5	SB E Fork Lewis River Bridge	Painting	2028 - 2035	WSDOT	\$4,305,348	R	Bridge	Sustainability & Resiliency
I-5	N Fork Lewis River Bridge SB	Repair steel truss and concrete approach spans	2028 - 2035	WSDOT	\$10,031,031	R	Bridge, Pavement	Sustainability & Resiliency

Facility	Cross Streets	Project Description	Estimated Completion Year	Jurisdiction /Agency	Project Cost Estimate	Regional (R) Local (L)	Performance Measures	RTP Goals
I-5/I-205	Salmon Creek Interchange	Planning study for Salmon Creek Interchange Project Phase II	2036 - 2045	WSDOT	\$300,000	R	Safety, Air Quality, Congestion	Accessibility & Mobility
I-5/I-205	Salmon Creek Interchange Phase II	Implement improved access from NE 134th St to I-205	2036 - 2045	WSDOT/Clark County	\$35,000,000	R	Safety, Air Quality, Congestion	Accessibility & Mobility
I-205	Padden Pkwy Interchange	Construct a direct connection to NE 72nd Ave from NB I-205 off-ramp to Padden Parkway	2036 - 2045	WSDOT	\$50,000,000	R	Safety, Air Quality, Congestion	Accessibility & Mobility
I-205	Padden Pkwy/ NE 134th St	Install ramp meters on NB on-ramps	2028 - 2035	WSDOT	\$1,200,000	R	Safety, Air Quality, Congestion	Accessibility & Mobility
I-205	SR 500 to Padden	Install auxiliary lanes	2028 - 2035	WSDOT	\$46,228,160	R	Safety, Air Quality, Congestion	Accessibility & Mobility
I-205		Install Active Traffic Management NB Glenn Jackson Bridge to NE Andresen Rd.	2028 - 2035	WSDOT	\$10,440,000	R	Safety, Pavement, Air Quality, Congestion	Accessibility & Mobility
I-205	Paden to MP SB	Install Active Traffic Management SB NE Andresen Rd. to Glenn Jackson Bridge	2036 - 2045	WSDOT	\$8,640,000	R	Safety, Pavement, Air Quality, Congestion	Accessibility & Mobility
SR 14	Lieser Rd	Construct auxiliary lane from Lieser Rd. on-ramp to I-205 SB Ramp	2028 - 2035	WSDOT	\$10,000,000	R	Safety, Pavement, Air Quality, Congestion	Accessibility & Mobility
SR 14	West Camas Slough Bridge	Painting	2020 - 2035	WSDOT	\$6,491,050	R	Bridge	Sustainability & Resiliency
SR 14	West Camas Slough Bridge	Rebuild bridge	2036 - 2045	WSDOT	\$52,700,000	R	Bridge	Sustainability & Resiliency
SR 14	SE 192nd Ave. to Columbia House Blvd.	Install WB ramp meters	2036 - 2045	WSDOT	\$2,750,000	R	Safety, Air Quality, Congestion	Accessibility & Mobility

Facility	Cross Streets	Project Description	Estimated Completion Year	Jurisdiction /Agency	Project Cost Estimate	Regional (R) Local (L)	Performance Measures	RTP Goals
SR 14	Columbia House Blvd to I-205	Install EB ramp meters	2028 - 2035	WSDOT	\$1,800,000	R	Safety, Air Quality, Congestion	Accessibility & Mobility
SR 500	Fourth Plain Blvd	Implement EB and WB displaced left-turns from Fourth Plain Blvd to SR 500/SR 503	2036 - 2045	WSDOT	\$20,000,000	R	Safety, Air Quality, Congestion	Accessibility & Mobility
SR 500	Gher Rd. to St. Johns Rd.	Install WB ramp meters	2028 - 2035	WSDOT	\$3,600,000	R	Safety, Air Quality, Congestion	Accessibility & Mobility
SR 500	St. Johns to Thurston Way	Install EB ramp meters	2028 - 2035	WSDOT	\$3,000,000	R	Safety, Air Quality, Congestion	Accessibility & Mobility
SR 502	SR 502 & NE 92nd Ave	Add south leg of intersection, & modify signal	2028 - 2035	WSDOT	\$1,100,000	R	Safety, Air Quality, Congestion	Accessibility & Mobility
SR 502	SR 502 & W 29th Ave	Add south leg of intersection & signalize	2036 - 2045	WSDOT	\$1,400,000	R	Safety, Air Quality, Congestion	Accessibility & Mobility
SR 503	NE 99th St to NE 244th St	Restripe for buffered bike lanes and install median curb for improved access control	2028 - 2035	WSDOT	\$43,000,000	R	Safety, Pavement, Congestion, Bridge, Non-SOV	Accessibility & Mobility
SR 503	SR 502/Main St to North City Limits	Add second lane in each direction and extend shared use path from Onsdorff to the north city limits	2036 - 2045	WSDOT	\$11,600,000	R	Safety, Pavement, Congestion, Bridge, Non-SOV	Accessibility & Mobility
SR 503	SR 503 & NW 5th St	Add east-west right-in right-out on east side of SR 503	2028 - 2035	WSDOT	\$300,000	R	Safety, Pavement, Congestion, Bridge, Non-SOV	Accessibility & Mobility

Facility	Cross Streets	Project Description	Estimated Completion Year	Jurisdiction /Agency	Project Cost Estimate	Regional (R) Local (L)	Performance Measures	RTP Goals
SR 503	SW Eaton Blvd to North City Limits	Construct multimodal path	2036 - 2045	WSDOT	\$1,200,000	R	Safety, Pavement, Congestion, Freight, Non-SOV	Accessibility & Mobility
SR 503	SR 503/Padden Pkwy to NE 144th Vic	Install Median Curb	2028 - 2035	WSDOT	\$2,000,000	R	Safety, Pavement, Congestion, Freight, Non-SOV	Safety & Security
SR 503	at Padden Pkwy	Add Interchange	2036 - 2045	WSDOT	\$45,000,000	R	Safety, Pavement, Congestion, Freight, Non-SOV	Accessibility & Mobility
SR 503	NE 65th St	Restripe the WB approach to a dedicated left-turn lane and shared through/right-turn lane. Implement flashing yellow arrows on 65th St	2028 - 2035	WSDOT	\$25,000	R	Safety, Pavement, Congestion, Freight, Non-SOV	Accessibility & Mobility
SR 503	Padden Pkwy	Add real-time travel signs north of Padden Pkwy to provide I-205 travel time comparisons; add additional static signs to guide travelers to I-205	2028 - 2035	WSDOT	\$2,000,000	R	Safety, Pavement, Congestion, Freight, Non-SOV	Accessibility & Mobility
SR 503	NE 149th St to SR 502	Upgrade existing shared-use path to meet width standards	2036 - 2045	WSDOT/Battle Ground/Clark County	\$1,800,000	R	Safety, Pavement, Congestion, Freight, Non-SOV	Safety & Security
SR 503	NE 99th St to NE 149th St	Implement Leading Pedestrian Intervals at intersections with high pedestrian volumes	2036 - 2045	WSDOT/Clark County	\$500,000	R	Safety, Air Quality, Congestion	Safety & Security

Facility	Cross Streets	Project Description	Estimated Completion Year	Jurisdiction /Agency	Project Cost Estimate	Regional (R) Local (L)	Performance Measures	RTP Goals
SR 503	NE 119th St	Planning Study for SR 503/NE 119th St	2036 - 2045	WSDOT/Clark County	\$150,000	R	Safety, Pavement, Congestion, Freight, Non-SOV	Economic Vitality & Quality of Life
SR 503	Eaton Blvd to NW 25th	Urban upgrades to SR 503 cross-section within Battle Ground city limits	2036 - 2045	WSDOT/Battle Ground	\$11,450,000	R	Safety, Air Quality, Congestion	Safety & Security
SR 503	NW 25th St/NE 244th St	Intersection Improvements at SR 503/NW 25th St (signal timing or roundabout)	2036 - 2045	WSDOT/Battle Ground	\$5,800,000	R	Safety, Air Quality, Congestion	Economic Vitality & Quality of Life
NE Fourth Plain	NE 117th Ave to NE 162nd Ave	Intersection capacity & operational upgrade	2028 - 2035	WSDOT	\$3,400,000	R	Safety, Air Quality, Congestion	Accessibility & Mobility
NE Fourth Plain	SR 503 to NE 137th Ave	Improve signal timing	2028 - 2035	WSDOT/Vancouver	\$200,000	R	Safety, Air Quality, Congestion	Accessibility & Mobility

20-Year Project Map (Regional Projects)
